Postman
Xcode

Projects

Full Stack + Cross Platform Development
June 2019 - Present

Memonetize   memonetize.herokuapp.com
- Developed a CRUD based application with a Rails API and a React client where a user can post and view memes.
- Enabled image storage on AWS S3 and implemented a subscription model using Stripe API.
- Wrote **RSpec** test-cases to ensure efficient functioning of models and controllers.
- Currently building a React Native application for cross-platform access.
- *Tech Stack - Ruby on Rails, React, Stripe API, AWS Ruby SDK, IBM Watson SDK*

Game Development
April - May 2019

Ocean Defenders   ocean-defenders.firebaseapp.com
- Collaborated with four team members to build a tower defense game that educates children about the impacts of incorrect garbage disposal.
- Familiarized with different **Agile** development techniques such as daily scrum meetings, iterative and incremental delivery etc.
- Built and deployed the application online using WebGL and on Google Play Store.
- *Tech Stack - Unity, C#, Google Firebase API, Unity Collab*

Full-Stack Development
Jan - April 2019

SpaceShare   spaceshare-b68f7.firebaseapp.com
- Worked in a team of 3 to develop a full stack web application that helps users find and rent storage space listings.
- Built methods to upload listing images in Firebase Storage , request listings and sort them, based on length, width and height.
- Researched on Algolia API to enable full text-based search of listings.
- *Tech Stack - Javascript, HTML/CSS, Google Firebase API, Google Places API.*
